Profile Summary

Results-driven Software Engineer candidate with strong foundations in Java, Data Structures & Algorithms, Object-Oriented Programming, and backend development. Hands-on experience building enterprise-style applications including Banking Management and Smart Locker Systems using Java and scalable design principles. Strong interest in full-stack engineering with Spring Boot, REST APIs, SQL, and Angular. Seeking to contribute as an Application Engineer at Google.

Education:

Vellore Institute of Technology (VIT-AP), Amaravati — 2021 – 2025
B. tech in Computer Science and Engineering — **CGPA**: 7.8/10
Class XII – AP Board — **Marks:** 968/1000
Class X – AP Board — **CGPA:** 9.7

Experience:

UBS (Union Bank of Switzerland) — Jan 2025 – Jun 2025
Reporting & Analysis Specialist Internship — Certificate

- Developed and automated reports (IB and GB) for Product Controllers and Clients.
- Collaborated with cross-functional teams to investigate and analyse revenue streams.
- Gained experience in automating, deploying, and supporting infrastructure.

Skills:

Languages: Java, SQL, JavaScript, Python (basic)
Frameworks: Spring Boot, Angular (basic), REST APIs
Core CS: Data Structures, Algorithms, OOP, DBMS, OS, Computer Networks
Databases: MySQL
Tools: Git, GitHub, IntelliJ IDEA, VS Code
Concepts: System Design Basics, Microservices Basics

Projects:

Smart Locker Management System — Project Link

- Designed and developed a scalable locker allocation system for parcel/package management.
- Implemented automatic locker assignment based on package size and availability.
- Built package lifecycle tracking with statuses such as waiting, delivered, and expired.
- Applied object-oriented design using classes, enums, encapsulation, and modular architecture.
- Simulated real-world logistics workflows for enterprise operations.

Skills Used: OOPs (Inheritance, Encapsulation, Polymorphism, Abstraction), Java DSA (ArrayList, HashMap, Queue, Set)

Banking Management System — Project Link

- Built a banking application supporting account creation, deposits, withdrawals, transfers, and balance tracking.
- Implemented secure business logic using encapsulation and modular class design.
- Used HashMap / ArrayList for account storage and transaction processing.
- Added transaction history and validation checks for reliability.

Skills Used: OOPs (Encapsulation, Inheritance, Method Overloading, Exception Handling), Java DSA (HashMap, ArrayList, LinkedList)

Achievements:

- Cleared Amazon SDE-1 Off-Campus Online Assessment. — selection email
- Cleared and received an **TCS Digital offer Letter** (higher-track fresher hiring category) for Systems Engineer role. — selection email
